

Dear Editor,

As this is a pure analytical paper, I have not used any code (apart from gnuplot to plot the figures). The only data that are used are the set of mean values and standard deviations that are given in the text.

I have included the mandatory section.

Please note also that I have spotted an error at the beginning of Figure 2. It was "as Figure 1", but that referred to the original version. This Figure 1 does no longer exist. Thus I had to rewrite the sentence as "The trade-off risk curve ...".

Best regards,
Klaus Gierens
